

This Keynote template is optimized for our widescreen displays.

**The critical text on your ads
(names, dates, times, locations, etc.)
should not be any smaller than this.**

To save your file from Keynote:

1. Click on the File menu, then “Export...”
2. From the options at the top of the new window, select “Images”, then select JPEG or PNG from the “Format” drop-down menu.
3. Set the Quality to 100% by moving the slider head all the way to the right.
4. Click “Next...” to name and save your file. Remember where you saved it so you can upload it later.

Please delete this text box when you are done reading.
